

**ProfitGuard™** is a business credit reporting and risk monitoring service providing account specific credit information exclusively to companies in the metals industry.

**Market Challenge Today: Quick Credit Decisions**

*Need to make a quick and effective credit decision? – ProfitGuard can help. Our new CreditPro Program will allow your company to safely compete in today’s rapidly changing environment. Respond quickly and with confidence when you need to approve a credit limit by using CreditPro’s Credit Express Report.*

## Product Summary: Credit Express Report (CER)

CreditPro’s CER report provides a credit limit recommendation (typically within a 24 hour turnaround time) based on a current “snapshot” of your customer’s risk profile. The report is presented in a condensed format, yet decisions still undergo a 360 degree review by one of our analysts.

### *What information is included?*

- Customized Limit Recommendation
- Credit Scores & History
- Risk Characteristics
- Company Attributes
- Legal Items
- Trade Payments to Suppliers
- Financial Statement Analysis (Where Available)

### *Let’s boil it down - When would you use a Credit Express Report?*

The CreditPro CER provides you with the confidence to make a timely credit decision and a sound business decision – to ship at appropriate exposure levels. You can use the CER when you’re unsure of the limit to extend, if you’re reviewing current customers’ credit lines, bidding for new business, or if you want a professional recommendation to validate your decision. You will find our CER to be an essential tool to expedite your decision process.

For example, a new buyer needs a shipment within 48 hours – This opportunity has potential for a higher margin and will ultimately lead to additional revenue. The problem: this is a competitive bid that requires a quick and accurate decision. You don’t have time to secure financials, make calls, and chase bank & trade data – you need intel fast! The CreditPro CER is your solution.

### **Cost Concerns?**

**No Problem.**

The CreditPro subscription has a starting cost of \$1,375 which includes 25 units to be used for reports and or monitoring key customers.
